About RemoteLock

RemoteLock is the only software company providing universal access control for those in the vacation rental, multifamily and commercial sectors. The cloud-based software is hardware-agnostic and allows customers to easily manage every door from one single dashboard to save time, money and hassle.

More About RemoteLock

Founded in 2011 and headquartered in Denver, CO, RemoteLock is used in over 65 countries with over 100 million opens and 40 million users each year.

About Universal Access Control

Universal access control from RemoteLock manages smart locks from all the leading brands, as well as wired access control systems. The flexible design of an open API allows our customers to manage different hardware brands and integrate with many different software programs on a single system and across property portfolios. With universal access control from RemoteLock, customers enjoy a single, centralized way to manage EVERY door, no matter the type, easily and remotely.

Remote Access

Because the software is cloud-based, property owners and managers can remotely manage and control access to any space from anywhere in the world.

Automate Guest Access

RemoteLock allows you to easily manage self-expiring access for guests to make sure they only have access when and where they should.

Automate Cleaning & Maintenance Access

Schedule housekeeping access, and track when cleaners enter and exit your property. Quickly add or revoke access for unplanned maintenance or schedule changes.

Scalable & Future-Proof

RemoteLock software is infinitely scalable, allowing customers to easily expand the system from 10 doors to thousands. With the flexibility of an open API, the platform is also future-proof with a continually expanding complement of lock and hardware integrations.

Social Media

Tag RemoteLock and use these recommended hashtags in your social media posts to reach even more audiences. Be sure to check out the RemoteLock Partner Image Library for supporting imagery as well.
